PROFILE

I am a well-seasoned Senior Full-Stack Engineer with experience designing and delivering enterprise-grade web applications using JavaScript, TypeScript, React, Node.js, Python, and AWS. Experienced in architecting scalable microservices, RESTful APIs, and distributed systems while building automated CI/CD pipelines, managing containerized deployments with Docker and Kubernetes, implementing Infrastructure as Code, and leveraging AWS services for scalable, secure, and highly available solutions.

WORK EXPERIENCE

Mission Perform – Mississauga, ON (May 2025 - Present)

Software Developer

- Designed and developed enterprise-grade SaaS applications using **JavaScript, React.js, Node.js, Express, MongoDB** and **MySQL**. delivering scalable solutions that supported **10,000+** users
- Designed, developed, and maintained Node.js microservices and **RESTful APIs** to support internal platforms and customer-facing applications.
- Implemented secure authentication using **JWT** and Microsoft Entra ID (Azure AD), , strengthening application security while enabling single sign-on (SSO) and reducing authentication-related support requests.
- Developed reusable backend middleware for authentication, validation, logging, and error handling

Cloud & Deployment

- Designed and implemented a scalable microservices architecture on AWS using **EC2, ASG, ALB, S3, and CloudFront**, while integrating automated CI/CD pipelines that improved deployment reliability and reduced **operational costs** by **70%**
- Built automated Jenkins CI/CD pipelines with role-based access control (**RBAC**), improving deployment reliability and accelerating software delivery.
- Utilized Amazon **CloudWatch** to monitor application and infrastructure health, analyze logs, configure alarms, and troubleshoot production issues across AWS environments.

MDL Systems – London, ON (May 2024 – April 2025)

Software Developer

- Designed, developed, and maintained **enterprise-grade** web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering scalable, secure, and high-performance solutions.

- Built and maintained scalable **RESTful APIs** and microservices, optimizing database queries, caching, and asynchronous processing to reduce API response times by **45%** and increase system **throughput by 60%**.
- Translated business requirements into technical solutions by collaborating with product managers, designers, and stakeholders to deliver high-quality software.
- Conducted code reviews and mentored junior developers and interns, promoting clean code practices, software design principles, and collaborative development.

Cloud & Deployment

- Designed and maintained AWS cloud infrastructure using EC2, Auto Scaling Groups, ALB, CloudFront and S3.
- Developed event-driven serverless functions with **AWS Lambda** for background processing, scheduled tasks, and API integrations, improving application scalability and reducing operational overhead.
- Implemented application monitoring, centralized logging, automated alerting, and performance dashboards using **Amazon CloudWatch**, enabling faster issue detection and reducing production incidents by 50% and mean time to resolution (MTTR) by 65%.
- Containerized applications using **Docker** and collaborated on deployments to **Kubernetes** environments, improving deployment consistency, scalability, and high availability across development and production environments.

Soniwave Tech Inc – Saskatoon, SK (March 2023 – April 2024)

Full Stack Developer

- Designed and developed enterprise-grade web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering scalable, secure, and high-performance solutions that supported over **10,000+ concurrent users**.
- Developed and maintained **microservices-based backend applications** using Node.js and Express.js, enabling scalable, modular, and independently deployable services.
- Leveraged Firebase Authentication, Firestore, and Cloud Functions to build secure, real-time, and scalable application features.
- Developed reusable, modular UI components using React, implementing responsive, mobile-first designs to ensure a consistent user experience across devices.

Cloud & Deployment

- Integrated AWS services including **Amazon S3** for file storage, **Amazon EC2** for application hosting, AWS CloudWatch for monitoring and log analysis, and AWS IAM for secure access management, improving application reliability and operational visibility.
- Developed and deployed microservices on AWS EC2, leveraging Amazon CloudWatch for monitoring, IAM for secure access control, and Amazon S3 for object storage.

- Collaborated with cross-functional teams using Git and GitHub, participating in branching strategies, pull requests, code reviews, and **CI/CD** workflows to maintain code quality.

AndJemz Tech Inc – Nigeria, Abj (February 2022 – February 2024)

Python Developer

- Developed and maintained scalable web applications using Python and Django.
- Designed and implemented RESTful APIs for efficient data exchange between frontend and backend.
- Utilized PostgreSQL for database management and optimized queries for performance.
- Assist in package application integration, data conversion planning, and provided key technical support for vendor applications.
- Collaborated with cross-functional teams using GitHub / GitLab for version control and agile development.

SKILLS

- **API Development:** RESTful APIs, Node.js/Express, Django REST
- **Programming Languages:** JavaScript (ES6+), Python, Bash
- **Databases:** MongoDB, MySQL, PostgreSQL, Oracle
- **DevOps & Cloud:** AWS (EC2, S3, CloudFront, Lambda), Docker, Vagrant, PM2, NGINX, GitHub Actions, Terraform
- **Testing & Monitoring:** Jest, React Testing Library, Observability tools, Logging strategies
- **Other:** REST APIs, Passport.js/OAuth, JWT, WebSockets, D3.js (data visualization)

EDUCATION

Fanshawe College, London, ON – Web Development and Internet Applications (03/09/2023 – 16/04/2024)

Cyprus International University, Nicosia, Cyprus – **PhD.** Management Information Systems (07/09/2017 – 07/06/2020)

Cyprus International University, Nicosia, Cyprus – **MSc.** Information Technologies (02/02/2016 – 02/06/2017)

CERTIFICATION

AWS Certified Cloud Practitioner – Amazon Web Services (AWS) (Jun 2026)
